Division: Web-Hed Technologies, Inc

Location: Lackland AFB, San Antonio, Texas

Job title: AFNetOps Long Range Trends and Metrics Analyst

Reports to: Janie Gonzalez

Title: C.E.O.

Level/Grade: TBD

Type of position:

Full-time

Part-time

Contractor

Intern

Hours_40__/_week

Exempt

Nonexempt

General Description:

WHT AFNetOps staff will provide direct support to the US Air Force Network Operations in Command and Control (C2), planning and execution of the Air Force network warfare operations (NWO) mission, including development and implementation of tools and procedures for Net Defense (NetD) and Net Attack (NetA) operations. Team members will assist in planning, coordinating, analyzing, documenting and reporting results of NWO missions at the operational level. They will also develop new methods to execute special computer security monitoring, assessments and exercises of the Air Force information infrastructure security posture.

This position will be involved in analysis of current operational-level trends such as vulnerabilities, threats, risk, policy, and targeting and determine the impact they have on operations. Candidate will assist operators in capturing AF level data, identify positive and negative trends, and apply historical trending and correlation to improve response times. The candidate will use trends analysis to produce recommendations to the AFNetOps commander and staff for action.

Work experience requirements:

- Candidates should have experience performing network security operations. Candidates must possess an **active** TS/SCI security clearance. Individuals must work well in a team environment and possess excellent communication skills.

Education Requirements

- Requires a Bachelors degree plus 3 years experience.
